BATTERY OR DC OPERATED

- Convenient power options for field use

STREAMLINED CONNECTIVITY FOR MOST JCM PRODUCTS

- Supports iVIZION, GEN2U, GEN5, TBV, UBA, VEGA, iPRO/iPRO-RC

BLUEWAVEDX™ IS JCM GLOBAL'S NEWEST INDISPENSABLE TOOL FOR EVERY SERVICE TECHNICIAN!

Using high-speed data transfer, this lightweight handheld tool allows you to update, configure, and test your bill validators and printer with ease!

Thanks to the high contrast two-color LCD screen, users can now easily select firmware versions before transferring them.

By connecting the BlueWaveDX to the bill validator via USB, the device allows the user to view the current firmware version, acceptance rate on the last 100 banknotes, enable or disable ICB function, run diagnostic tools, and review status errors.

The BlueWaveDX is powered by either AAA batteries or a DC power supply.

BlueWaveDX™

Portable Data Transfer Tool
